

A heatmap visualization showing the relationship between eight variables: cycle_none, cycle_three, cycle_four, interior_none, interior_four, position_none, position_three, and position_four. The color scale ranges from dark purple (low) to yellow (high). The diagonal elements are bright yellow, indicating a high self-correlation. The off-diagonal elements show varying degrees of correlation, with some pairs (like cycle_none and cycle_three) showing higher correlation than others.
